

TARA LABS

RSC Prime M2 Speaker Cable

The RSC® Prime M2 is a traditional stereo loudspeaker cable, using the Gen 1 Rectangular Solid Core® conductors. This design uses 2 of the Gen 1 conductors for the positive run, and another 2 Gen 1 conductors for the negative run.

The RSC® Prime M2 delivers clean and dynamic bass frequencies with a very open and natural sounding mid-range that is well extended into the high-Frequency ranges.

- * BSM (with 1/4" Spades or Bananas)
- * 14 gauge LF ~ HF conductor runs.
 - * SA-OF8N® copper.
 - * RSC® Gen 1 conductors.
 - * Chemically stabilized polymers.
 - * Single-run bi-wiring convenience.
- * Powerful bass weight with full range dynamics.
 - * Articulate and detailed high frequencies.

REVIEWS:

"The TARA Labs RSC Prime are phenomenal in all aspects in my system...tremendous bass reach and foundation without, smooth transition to present midrange with no forwardness, detailed highs without excessive brightness or sparkle...and a soundstage that has extended far beyond the speakers separation as well as depth and placement of instruments within the overall presentation." - "Big O."

"I wanted to drop you a note and thank you for the recommendation and great service. I received TARA Labs RSC Prime (Prime M2) speaker cables. They sound fantastic in my system and are a huge compliment to my Spendor A6's" - David
