

Why replace your power cords with TARA Labs' AC cables? To eliminate noise, interference and "grunge" lurking in your AC power. Until you experience the difference you'll never know how much AC interference is coloring the signal that feeds your audio or home theater equipment. A well-designed and shielded power cord can improve sound clarity and picture quality, and instantly enhance overall performance.

### RSC® PRIME AC

- Uses proprietary Rectangular Solid-Core® conductors.
- Lower noise floor reveals subtle ambient detail in music and soundtracks.
- Delivers crystal-clear picture with vivid color.

Applications: High-end to superior quality audio and home theater components.

### RSC AIR™ AC

- Airtube™ technology reduces dielectric distortion within cable.
- Extremely low noise floor.
- Unsurpassed picture clarity.

Applications: Superior quality audio and home theater components.

### THE ONE™ AC

- The ultimate AC power cord, combining RSC® conductors and Airtube™ technology.
- Unsurpassed sonic realism, rich in ambient detail.
- Picture sharpness, color saturation, and contrast ratio are maximized to their full potential.

Applications: Superior to extreme quality audio and home theater components.
