

# APOLLO SERIES

## Apollo II

The Apollo II uses high quality materials for this unshielded Solid Core twisted pair of frequency tuned SA-OF8N copper conductors. The sound is smooth, accurate, neutral and open. All TARA Labs cables are handcrafted in Oregon, USA.

## Apollo I

Apollo I uses the TARA Labs frequency tuned SA-OF8N conductor, proprietary dielectric material and CCI testing and the result is nothing short of stunning! Open and accurate sound with precise detail and resolution. Perfect for the up and coming audiophile.

## Apollo Speaker

The Apollo features 2-14 AWG conductors each (+) and (-) conductor path consisting of seven SA-OF8N® "Pressure Grouped" solid core copper conductors. Each conductor run is finished by extruding a thin layer of SVPET™ primary dielectric. The Apollo S/C is terminated with a BSM. This enables the user to switch out termination and use either spades or bananas. The Apollo delivers live sound with solid bass, smooth highs and increased clarity.

## Apollo Digital

The Apollo digital audio cable is an excellent choice of digital cable for a wide range of components. It is exceptional in dealing with timing errors as they are greatly reduced by our use of superior quality cable, along with exceptional shielding to reject interference within the cable. Apollo Digital is open and accurate with excellent base punch and control.

## Apollo Sub

The Apollo Sub-woofer cable is the first in a series of awesome subwoofer cables. Used in a home theater setup, the low frequency response is quite amazing. \*SA-OF8N conductor; dual shielded; SVPE primary dielectric around conductors; both Mylar-backed foil & Anti-corrosion copper braided shield. Excellent bass punch, control, articulation & detail.

## Apollo Phono

The Apollo phono cable is our entry level cable manufactured to be compatible with a wide variety of phono cartridges. The perfect phono cable for the up & coming audiophile. Available termination: RCA & XLR. Precise & detailed, natural & musical.

## Apollo AC

TARA Labs Apollo-AC power cable is superior to stock OEM cables. Hand-crafted. Each conductor run is dual shielded against EMI/RF interference. "AC power cables are usually the last cables to be included in an audio system, but with the right cable, you can have a vast improvement in sound quality."
