

"Bass was clean, deep, open, and very dynamic. Mids were sweet, very transparent, completely free of colorations. Highs were airy and extended without a trace of artificial brightness. This had to be the perfect speaker cable!"

RSC® PRIME 500

- Great bass weight and definition.
 - Superb mid-range clarity and effortless high frequency extension.
- Applications: Quality to high-end audio and home theater systems where economy may be a consideration; all channels; passive subwoofers.

Termination: Banana/Spade Modules

RSC® PRIME 1000 (single run bi-wire)

- Single-run bi-wiring convenience.
- Powerful bass weight with full range dynamics.
- Articulate and detailed high frequencies.

Applications: Quality to high-end audio and home theater systems where economy may be a consideration; all channels; biwireable speakers.

Termination: Banana/Spade Modules

RSC® PRIME 1800 (single run bi-wire)

- Separately shielded low frequency runs eliminate phase shift and amplitude variations.
- Neutral and open, with spectacular clarity.

Applications: High-end audio and home theater systems; all channels; biwireable speakers.

Termination: Banana/Spade Modules

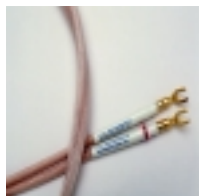

RSC® REFERENCE GENERATION 2+

- Revealing, yet smooth.
- Dynamic, natural and open sound.
- Most versatile, highest performance RSC® speaker cable.

Applications: High-end to superior quality audio and home theater systems; all channels.

Termination: Banana/Spade Modules

RSC® REFERENCE BI-WIRE (single run bi-wire)

- Single run bi-wire convenience.
- Extremely transparent, open and neutral sound.
- Revealing, with spectacular clarity and power.
- Superior phase coherency.

Applications: High-end to superior quality audio and home theater systems; all channels; biwireable speakers.

Termination: Banana/Spade Modules
